

Demonstration of Proposed Features

Date	29 June 2026
Team ID	
Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Crop Recommendation	Predicts the most suitable crop based on soil nutrients and environmental conditions.	Implemented	Yes	Core functionality completed successfully.
2	User-Friendly Interface	Responsive web interface for entering soil and climate parameters.	Implemented	Yes	Built using HTML, CSS, Bootstrap, and JavaScript.
3	ML-Based Prediction	Uses a pre-trained machine learning model to generate crop recommendations.	Implemented	Yes	Integrated with Flask backend.
4	Input Validation	Validates user inputs before sending them for prediction.	Implemented	Yes	Prevents invalid or empty inputs.
5	Prediction Result Display	Displays the recommended crop clearly after processing.	Implemented	Yes	Result shown instantly on the webpage.
6	Flask Backend Integration	Connects frontend with the machine learning model through Flask routes.	Implemented	Yes	End-to-end functionality demonstrated.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
